SUMMARY

Mathematics graduate (GPA 3.85/4.00) with hands-on experience building AI and machine learning solutions, including RAG-based chatbots, computer vision systems, and predictive models. Recently completed a six-month curriculum developer internship at Dicoding Indonesia, including building a Naive RAG chatbot with LangChain as a live demo for a technical session I delivered, and authoring a published article on chunking strategy for the company blog. Previously completed 930+ hours of machine learning training through the ASAH program with Accenture, and developed YOLOv8-based traffic flow research that earned 2nd and 3rd place at two national competitions. Experienced across the AI/ML workflow, from experimentation to implementation, evaluation, and technical communication. Now seeking an AI engineer role focused on building practical, production-oriented systems.

WORK EXPERIENCES

Curriculum Developer Intern, Dicoding Indonesia **May 2026 – October 2026**

- Developed 4 microlearning courses end-to-end, including AI-focused courses on document translation with Gemini Chat and chatbot development with Gemini Gems, covering tool research, hands-on testing, content development, and assessment creation.
- Developed an n8n automation workflow for rating appeal notifications, routing 41 appeals to the correct PIC and streamlining the team's process for tracking and handling appeals.
- Delivered two 90-minute DevCoach sessions reaching 1.8k+ live viewers: "Mengenal RAG: Dari Konsep ke Implementasi Pertamamu" (4.64/5, 644 live viewers), including a Naive RAG chatbot demo built with LangChain using PP No. 51 Tahun 2023 as the knowledge base; and "Kenalan dengan Jev: Model AI yang Enggak Bisa Ngobrol" (4.66/5, 1.2k live viewers), introducing a System One model that returns structured decisions instead of text.
- Authored a technical article for the Dicoding blog, "Pentingnya Chunking Strategy dalam RAG," explaining how documents are split before indexing, the common chunking strategies, and how to select one for a given use case.
- Served as a technical instructor for Dicoding Bootcamp Batch 15 (Gen AI Engineer) and Batch 16 (Data Analyst), delivering 120-minute sessions to 40 and 25 participants, respectively, with self-developed slides and hands-on activities covering regression, classification, and AI-assisted end-to-end data analysis; received ratings of 4.79/5 and 4.87/5.
- Served as a co-trainer for a 90-minute GCC × Ekraf workshop with 30 participants, supporting hands-on development of an UMKM ordering web application using Google AI Studio, Supabase, GitHub, and Netlify.
- Developed 6 technical training decks end-to-end covering machine learning, deep learning, computer vision, time series, NLP, generative AI, data analytics, and predictive analytics, with 8 hands-on activities across the bootcamp materials.
- Resolved 140 module issues across AI, ML, DS, and DA courses, including coding errors, outdated libraries, and technical writing issues, while directly implementing content corrections.

Machine Learning Trainee, ASAH Program **August 2025 – December 2025**
Dicoding in association with Accenture

- Completed over 930 hours of intensive training in Machine Learning, Deep Learning, and Programming, maintaining an average performance score above 90/100.
- Built and optimized a machine learning model (CatBoost) for predictive lead scoring as part of a capstone project, including data preprocessing, feature engineering, and model evaluation, with explainable AI (SHAP) to support business insights, achieving a final evaluation score of 94/100.
- Developed machine learning pipelines including data preprocessing, feature engineering, and model evaluation.

- Built deep learning projects for computer vision tasks such as image classification and object detection, as well as text processing with a proficiency score of 91/100.
- Demonstrated strong technical foundations in Python and Git/GitHub for collaborative software development, achieving a perfect score of 100/100 in Programming Logic and Version Control.
- Acquired essential industry soft skills, including Project Management, Business Presentation, Critical Thinking, and Effective Communication through professional development modules.

Statistical Technical Team Intern, BPS Kota Tegal **April 2025 – July 2025**

- Designed data visualizations and infographics for Gross Regional Domestic Product (GRDP) of Tegal City by Expenditure (2020–2024) to support official statistical publications.
- Conducted descriptive statistical analysis and data visualization for SIMOPPEL (Port Operational Management Information System) dataset covering 2021–2024.
- Developed a web-based data processing tool for the Desa Cantik program in Kejambon Village and delivered training on web usage and data visualization techniques for local administrators.
- Processed and organized business data for the Statistical Business Register (SBR) to support preparation for the Economic Census 2026.
- Built a K-Means clustering model to classify sub-districts in Tegal City based on family welfare indicators (2024 dataset).

Data Scientist Intern, Home Credit Indonesia **January 2025 – February 2025**
Project-Based Internship (Rakamin Academy)

- Developed a credit scoring model using Logistic Regression and XGBoost to predict loan default risk based on historical customer data.
- Performed Exploratory Data Analysis (EDA), data preprocessing, and feature engineering to improve model performance.
- Addressed class imbalance using SMOTEENN and evaluated models using accuracy, precision, recall, and F1-score metrics.
- Generated data-driven insights and recommendations to support lending strategy decisions through analytical presentations.

SKILLS & CERTIFICATIONS

- Programming Languages: Python, R, SQL.
- AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, Large Language Models (LLM), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Computer Vision, Classification, Regression, Clustering.
- Development & Platforms: Git, GitHub, LangChain, n8n, Streamlit, Google AI Studio, Gemini, Supabase, Netlify, Jupyter Notebook, Visual Studio Code.
- Soft Skills: Critical Thinking, Analytical Thinking, Problem Solving, Attention to Detail, Team Collaboration, Communication, Data Storytelling, Time Management.
- Language: Indonesian (Native), English (Upper-Intermediate, CEFR B2 | EF SET).
- Certifications: SQL for Data Analysis (MySkill), Belajar Dasar Data Science (Dicoding Indonesia), Intro to Data Analytics (RevoU), Python Fundamental for Data Science (DQLab), R Fundamental for Data Science (DQLab), Data Science Fundamentals (DQLab), Fundamental SQL Using SELECT Statement (DQLab), SQL Basic Certificate (HackerRank), Belajar Dasar Structured Query Language (Dicoding).

ACHIEVEMENTS

2nd Place – Program Kreativitas Mahasiswa Asosiasi MIPA LPTK Indonesia **November 2025**
Universitas Negeri Gorontalo

- Research: "FLO – Traffic Flow Decomposition in Semarang Roads using YOLOv8 and the A* Algorithm".
- Ranked 2nd out of 40 teams at the national level.

3rd Place – UNITY Competition (National ICT Scientific Writing Competition) **June 2025**
Universitas Negeri Yogyakarta

- Research: “FLO – Traffic Flow Decomposition in Semarang Roads using YOLOv8 and Dijkstra Algorithm”.
- Ranked 3rd out of 25 teams at the national level.

EDUCATION

Bachelor of Mathematics **2022 – 2026**
Universitas Negeri Semarang
- GPA: 3.85/4.00.
- Relevant Coursework: Statistics, Probability, Programming Algorithms, Computer Programming, Database Systems, Discrete Mathematics, Data Mining, Time Series Analysis

LEADERSHIP & ACTIVITIES

Team Leader – Community Service Program (KKN) **January 2025 – March 2025**
Nyamat Village, Tengaran District, Semarang Regency
- Led and coordinated a multidisciplinary team of 11 students during a 58-day community service program, resulting in a final program evaluation score of 95.
- Organized and supervised the implementation of 18 community-based initiatives in collaboration with local authorities and community members.
- Initiated and implemented “MathLadder: Tangga Ilmu Matematika”, an educational game designed to improve arithmetic skills for 12 fourth-grade students at SD Negeri Nyamat.
